The screenshot displays the Azure DevOps web interface. On the left, a sidebar contains navigation links: Fitness Application, Overview, Boards, Repos, Pipelines, Test Plans (selected), Test plans, Progress report, Parameters, Configurations, Runs, and Artifacts. The main content area shows the details for 'Run 2 - User Registration and Authentication (Manual)'. It includes a 'Run summary' tab, a 'Summary' section with details like 'Run type: Manual', 'Owner: Vishal Sivashanmugam', and 'Completed 6 hours ago'. A large green donut chart with the number '1' in the center represents the 'Outcome', with a legend indicating 'Passed'. Below this, there is a section for 'Outcome by priority' with a green bar chart. The bottom of the interface shows 'Comments' (No comments) and 'Attachments' (empty).

The screenshot displays the Azure DevOps web interface for a Test Case. The browser address bar shows the URL: `dev.azure.com/231001248/Fitness%20Application/_testPlans/execute?planId=42&suiteId=44`. The page title is "TEST CASE: 46". The test case is titled "46 User Login with Credentials" and is owned by Vishal Sivashanmugam. It has 0 comments and an "Add Tag" button. The test case is in the "Design" state, located in the "Fitness Application" area, and is part of the "Fitness Application\Iteration 1" iteration. The "Steps" section shows a table with two steps:

Steps	Action	Expected result	Attachments
1.	The system should allow valid users to log in.	Logged in	
2.	Incorrect credentials should return an error message.	Incorrect credentials	

Below the table, there is a link: "Click or type here to add a step". The right sidebar contains sections for "Deployment", "Development", and "Related Work", each with links to relevant resources.
